

DISCOVER MORE WITH THE

CAT® S61

THERMAL BY  FLIR®

The Cat® S61 smartphone is built to be rugged and tough, to take on any challenging environment or tasks you throw at it. It's the upgrade to your Cat S60, backed by a powerful 4,500mAh battery; bigger, better, bolder than ever before.

We've taken the integrated thermal imaging camera from the S60 and given it an upgrade. Its enhanced software makes the resolution of thermal images twice as good. The Cat S61 can now read temperatures up to 400°C and it can live stream thermal video back to base. And, there's more. It boasts an indoor air quality monitor to alert you to high levels of indoor air pollutants (VOCs) and measures humidity levels. Plus it is the world's first smartphone with an integrated laser assisted distance measure.

Let's also not forget its world leading IP68, Mil-Spec 810G rugged credentials – drop proof up to 1.8m onto concrete, waterproof up to 3m for 60 minutes, including salt water, and resilient to all types of dust. This tool is the most advanced, most skilled and most loyal partner you need to get any job done.

THE TOOL TO HELP GET ANY JOB DONE

THERMAL IMAGING CAMERA

Powered by FLIR®

INDOOR AIR QUALITY MONITOR

Capable of measuring temperature, humidity and levels of Volatile Organic Compounds (VOCs)

LASER ASSISTED DISTANCE MEASURE

Point-to-point distances up to 8m

FULLY WATERPROOF

Waterproof up to 3M for 60 minutes.

Underwater 16MP rear camera

RUGGED: IP68, IP69 AND MIL-SPEC 810G

Dust proof and drop proof to 1.8m. Vibration, sand, salt mist and pressure resistant

POWERFUL BATTERY

(4500mAh). Up to 37 days standby time and 35 hours 3G talk time

OTHER GREAT FEATURES

- Super bright 5.2" FHD display with Corning® Gorilla® Glass 5 screen protection
- Optimised for outdoor use with auto wet-finger and glove support*
